

Some quick questions and Answers

Q: I like run on plastic track, how would I do on wood?

A: The club now has 1 plastic track to go with the 3 (soon to be 4) wood tracks. Running on plastic and wood are very different but both are exciting in their own way.

Q: I have a Model X car that I like to run! Can I run it in the club?

A: Probably. The club votes for each class that will run the next season as well as what modifications can and cannot be made. We don't want the person with the deepest pocket (\$\$) to win (at least not all the time). We try to adjust things so skill comes more in to play.

Q: I really don't have time to race every Sunday, is that OK?

A: Yes. We run 2 wooden road seasons a year, 2 wooden oval seasons, and 1 year long plastic track. You can come and race 1 or 2 or all 5 in the year.

Q: I don't have a controller. I rent/borrow one all the time...

A: You don't need one right away. Most of the club members have a few that they bring all the time for just that reason. Members have raced entire seasons on borrowed controllers. No big deal.

Q: I have a track at home. Can we race there?

A: Yes! In fact the club is always looking for new places to race.

Q: Do you build cars too? I have zero skill so I buy all my cars.

A: And you can keep doing that. You can run your plastic car(s) for their classes and not race the other classes BUT the other members will most probably loan you a car to race till you decide what you want to do. Have no building skill? There are people in the club who will go so far as to build the car for you.

Monaco Gran Prix Miniature Racing Club (MGPMRC), located in St. Louis, Missouri, USA, is a group of dedicated "scale model car racers" whose primary mission is to enjoy this sport/hobby.
